Expert Lecture on Industry Trends in DBMS

DATE: 29/08/2025

The lecture was about Industry **trends in DBMS** which was planned for Second Year Computer students to provide information of how data is managed on a large scale in industries. First, the faculty **Prof. Miss. T. P. Chavan** welcome and felicitated to Principal, industry expert and all HOD's. After that **Prof. Mrs. S. S. Walunj** and coordinators introduced the students to **Mr. Nitesh Waykar**. He gave the students a brief overview of what database actually is and the applications it has in day-to-day life. The session was interactive. The students were then explained why database is needed, why it is important, what are different trends in the world of database.

The session was quite informative for students. Students were asking the questions related to management of data and the doubts were solved by the speaker. Many new ideas were given to students, on how the users of the database are allowed to use the database and how important it is to keep the data secured stored in database. He also talked on the scope of engineers in database management field.

The Expert lecture concluded with a **Vote of Thanks** proposed by **Prof. Miss. N. S. Salunke**. He appreciated the speakers for their valuable inputs and encouraged all student to maintain positive response for next session

Student Feedback and Benefits

Students enjoyed learning about the Industry trends in DBMS, and the session was quite informative and interactive that students enjoyed it. Also it was beneficial for the students as now they will be able to make use of database in their projects efficiently.
